

Dropbox Quick Start

What is Dropbox?

Dropbox is a free service that lets you sync up your photos, files, and other documents. Any file you store on Dropbox will be automatically stored on your computer, phone, and even on Dropbox's servers. This means you can get your stuff on your computer & online in the office, without all your files cluttering your hard drive all the time!

Try Dropbox Today

After you install Dropbox on your computer, all Dropbox files in folders you're working on will sync up with those stored on Dropbox's servers. The Dropbox icon in the bottom right corner of your desktop will tell you when files are syncing. You'll also see a sync status bar in the bottom right corner of your desktop, phone, and the Dropbox website.

Go to [Dropbox's website](#) to get more information about how your Dropbox is doing.

Everything is up to date on your Dropbox account.

Files are being synced to your Dropbox account.
